(54) **METHOD FOR INHIBITING OR PREVENTING INFECTION IN A TRANSPLANT RECIPIENT**

(57) A method for inhibiting or preventing infection in a transplant recipient, the method comprising (i) providing T-cells from several potential donors; (ii) subjecting the T-cells from each donor to a separate 3rd party reac-

tivity test; (iii) determining the reactivity of each donor, whereby the donor with the highest reactivity is selected as the preferred donor for transplantation.
